

ARMESSE

Feel beautiful, be happy

About us

Since its start 20 years ago, Armesso has become the leader in international and local markets due to its innovative development and production of professional beauty products.

Due to Armesso's commitment to quality and the constant improvement of its processes, the achievement of becoming a leading brand has been made possible.

In addition to this, constant efforts to improve investigation, development and innovation, have contributed to perfecting its beauty products. These and many other reasons, have made Armesso stand out among the rest of the brands.

The effectiveness and noticeable results of our beauty products, have made the company experience international growth at an exponential level. Because of the popularity of our product line, Armesso Laboratories have opened in 15 other countries.

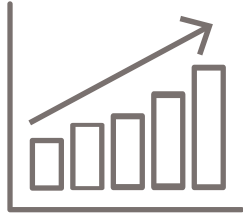

Our most important raw material for our processes, is the water used during the fabrication of our products. For this reason, the production plants rely on modern mineral-removal and reverse osmosis equipment, which generate purified WFI-class water.

All of our raw material, bottling and packaging require a guaranteed selection from our distributors which fulfill the demands of international expectations (FDA, USP, COLIPA, CTFA).

Administrative and production areas can rely on an up-to-date Quality Management System which is in accordance to the codes ISO 9001, 2008 version. These are certification systems implemented by international entities such as the Colombian Institute of Technical Certification Policies (ICONTEC) and IQ Net Management System.

Feel beautiful, be happy

Why choose Armesso?

BETTER RESULTS

“Increased effectiveness proven throughout the years.”

INGREDIENTS

“High quality ingredients which have undergone strict potency controls.”

QUALITY AND INNOVATION

“Leaders in new product development and ISO 9001-approved quality policies.”
